EDUCATION

Bachelor of Applied Computer Science, *Dalhousie University*

09/2021 – 04/2025 | Halifax, Canada

Coursework: Software Development, Database Management, Web Design, Web Development, Version Control, Mobile Computing, Systems Programming

Diploma in Computer Engineering, *Gujarat Technological University*

06/2018 – 06/2021 | Ahmedabad, India

Coursework: Data Structure, Java, Operating System, Software Engineering, Computer Networks, Python, C++, Algorithms

TECHNICAL SKILLS

Languages: Python, JAVA, C, C++, JavaScript, SQL, HTML5, CSS3

Frameworks: ReactJS, Django, NodeJS, ExpressJS, PHP, Bootstrap, Tailwind CSS, Spring

Databases: SQLite, SQL, MongoDB, NoSQL, Oracle, Firebase, Neo4j, Graph Database, PostgreSQL

Tools: Git, Docker, Eclipse, Postman, Code Block, Visual Studio, Figma, Jira, Supabase, MS 365, Google Cloud Platform, Android Studio

Methodologies: Test Driven Development, Agile, SCRUM, Software Development Life Cycle, ITIL

PROFESSIONAL EXPERIENCE

Symcor Inc, *Tier 2 Application Support*

03/26 – Present | Mississauga, Canada

- Provide Tier 2 production application support in a large enterprise environment by triaging, diagnosing, and resolving incidents via ITIL/EIM processes, meeting SLAs through effective prioritization and escalation management.
- Troubleshoot issues using application/system log analysis and knowledge repositories; collaborate with Level 2, Infrastructure, and Level 3 (Development) teams on complex incidents and required application changes.
- Create and maintain deployment/support documentation and knowledge articles; capture standardized resolution steps to improve consistency and speed of incident remediation.
- Execute routine application maintenance and support disaster recovery activities (DR readiness, documented failover steps, troubleshooting during failover); contribute to problem management by documenting incidents and supporting root-cause and long-term remediation efforts.
- **Tech Stack:** SQL, Database Management, Linux, ITIL, PostgreSQL.

Outlier, *Software Engineer - AI Trainer*

06/2025 – Present | Halifax, Canada

- Independently evaluated and critiqued AI-generated code, ensuring adherence to industry best practices and security standards.
- Enhanced AI solutions by optimizing code for robustness and maintainability using ReactJS, NodeJS, and Java.
- Authored and tested high-quality code samples, directly influencing AI model performance for enterprise applications.
- Improved application reliability by identifying issues across front-end, back-end, and database layers.
- **Tech Stack:** JavaScript, Java, ReactJS, NodeJS, TailwindCSS.

PROJECTS

TrueNAS SCALE TUI (Terminal User Interface), *Open-Source Project*

04/2026 – Present

- Designed and engineered a lightweight Terminal User Interface (TUI) optimized for TrueNAS SCALE 25.04+, providing systems administrators with full cluster visibility directly from the terminal.
- Integrated real-time system metrics, storage pool health, and service monitoring by establishing high-performance, asynchronous connections using JSON-RPC 2.0 over WebSocket.
- Implemented interactive dashboard components, customized sparkline graphs for CPU/Memory utilization, and key-bound macros to execute operations like pool scrubs and service power states.
- Containerized the application using Docker and Docker Compose to ensure zero-dependency deployment, and engineered a fallback architecture supporting config files, environment variables, and CLI overrides.
- Built a modular, highly scannable repository structure using modern Python packaging workflows, static analysis linting tools, and reactive application styling.
- **Tech Stack:** Python 3.13+, Textual (TUI framework), WebSocket, JSON-RPC 2.0, Docker, Tomli/TOML, Git

Stretch & Smile Website 📁, *Freelance Client Project*

01/2026 – 03/2026

- Architected and developed a responsive, full-stack web application to enhance the client's online presence and user engagement.
- Optimized frontend performance and global delivery by deploying serverless architectures via Cloudflare Pages.
- Collaborated directly with the client to translate business requirements into technical milestones, delivering the project within scope and on schedule.
- **Tech Stack:** React, Node.js, Cloudflare Pages, JavaScript (ES6+)

Beach Bluenoser

01/2024 – 04/2024

- Architected and deployed a tourism platform providing real-time information on Nova Scotia beaches.
- Optimized back-end code, achieving 50% performance improvement in loading times.
- Implemented Real-Time API data integration, map functionalities and personalized user profiles.
- **Relevant Skills:** Android Studio, Java, Firebase, GitLab, Jira, Google Cloud Platform
